EDUCATION

University of Washington

Master of Science (M.S.), Data Science

Seattle, WA

September 2024 - March 2026

Birla Institute of Technology and Science Pilani

Bachelor of Engineering (B.E.), Electronics and Communication

Goa, India

August 2017 - May 2021

TECHNICAL SKILLS

Programming Languages: Python, Pyspark, SQL, C++

Frameworks and Tools: AWS, Databricks, Docker, Git, Tableau, Mixpanel, Retool, TensorFlow, RestAPI, Airflow

Courses: Neural Networks, Probability and Statistics, OOP, Data Structures and Algorithms, Machine Learning, Image Processing, Digital Signal Processing, Database Management, Convex Optimistaion, Experiment Design and Statistical Learning

EXPERIENCE

CRED

Senior Data Scientist

Bengaluru, India

September 2022 - August 2024

- Engineered a dynamic pricing framework to optimize interest rates, **enhancing portfolio conversion by 17%** and achieved **\$12 million** in monthly incremental disbursals; implemented using **CatBoost Model (AUC 0.83)** and **linear programming** using Gurobi.
- Boosted loan application **click conversions by 30%** through a tailored homepage recommendation system powered by gradient boosting and user segmentation.
- Streamlined monthly disbursement planning for \$200 million by deploying an automated forecasting system built on tree-based algorithms, **delivering 95% accuracy and reducing manual effort by 20+ hours monthly**.

Data Scientist

June 2021 - September 2022

- Optimized approval rates by 5%** using a user group validation model powered by **linear optimization and random forests, delivering 84.5% accuracy**.
- Designed a proactive **model monitoring platform** featuring alert capabilities and detailed residual analysis, empowering model owners to promptly tackle model drift issues.
- Spearheaded the scaling of real-time services, including in-app asset activations and seamless real-time communications.

Data Scientist Intern

January 2021 - June 2021

- Designed a 30-day loan uptake **propensity model**, achieving a 0.78 AUC and **boosting offer conversion rates by 15%** through improved user targeting
- Engineered in-app and external communication triggers, enhancing loan application rates and contributing to over **10% of monthly loan disbursements**.

Niyo Solutions

Data Scientist Intern

Bengaluru, India

August 2020 - December 2020

- Analyzed user behavior in-app to identify drop-off points, **achieving 15% enhancement** in funnel performance.
- Developed a churn prediction model using LightGBM with 0.76 AUC, **reducing user drop-off by 12%** in the next months.
- Built a rule-based system for extracting SIP details from text, enhancing investment recommendations and risk assessments.

Relatas

Data Scientist Intern

Bengaluru, India

July 2020 - August 2020

- Developed a sentiment analysis system for email communications, enhancing sales insights and customer understanding.
- Integrated into CRM systems for enhanced sales analytics **increasing user adpotion by 12%**.

PUBLICATIONS

- Novel EEG Features for Consumer Emotion Prediction using Correlation-Based Subset Selection**
Presented at AMC IMX 2022 Conference • [Link](#)

AWARDS

University of Washington MSDS Hackathon 2025

Won first prize by using predictive modeling, constraint-based decision-making using **convex optimisation**, and market insights to design a solution for apartment recommendation • [Github Link](#)

ACADEMIC PROJECTS

Unlocking Climatic Solutions using Machine Learning • [Link](#)

- Developed KPIs to evaluate the impact of COVID-19 on climate change linked to human activities.
- Constructed a tree-based regression model to predict a city's climatic conditions over the next three months.

Scintillation detection using Unsupervised Learning • [Link](#)

- Examined the effect of scintillation on Global Navigation Satellite System (GNSS) signals.
- Developed a K-Means clustering model to categorize scintillation patterns, enabling correction of phase errors in GNSS signals.
